

Internxt

Series A investment round.

Internxt aims to enrich life through revolutionary technology. The goal is to create a vast range of **innovative mass-market services** that disrupt various technology industries.

Founded in July 2017. Completed seed round through an Initial Coin Offering (non-equity round). Since then, salary expenses (in total) have averaged \$15,000/mo. Marketing expenses have averaged \$7,000/mo. With our current funds and growth forecasts, we estimate that we can keep running without making any profits throughout all 2019. Ideally, we'd like to close a Series A (equity round) before that, so that we can keep focusing on subsidizing growth, instead of switching our focus to increasing profits to ensure we are cashflow positive.

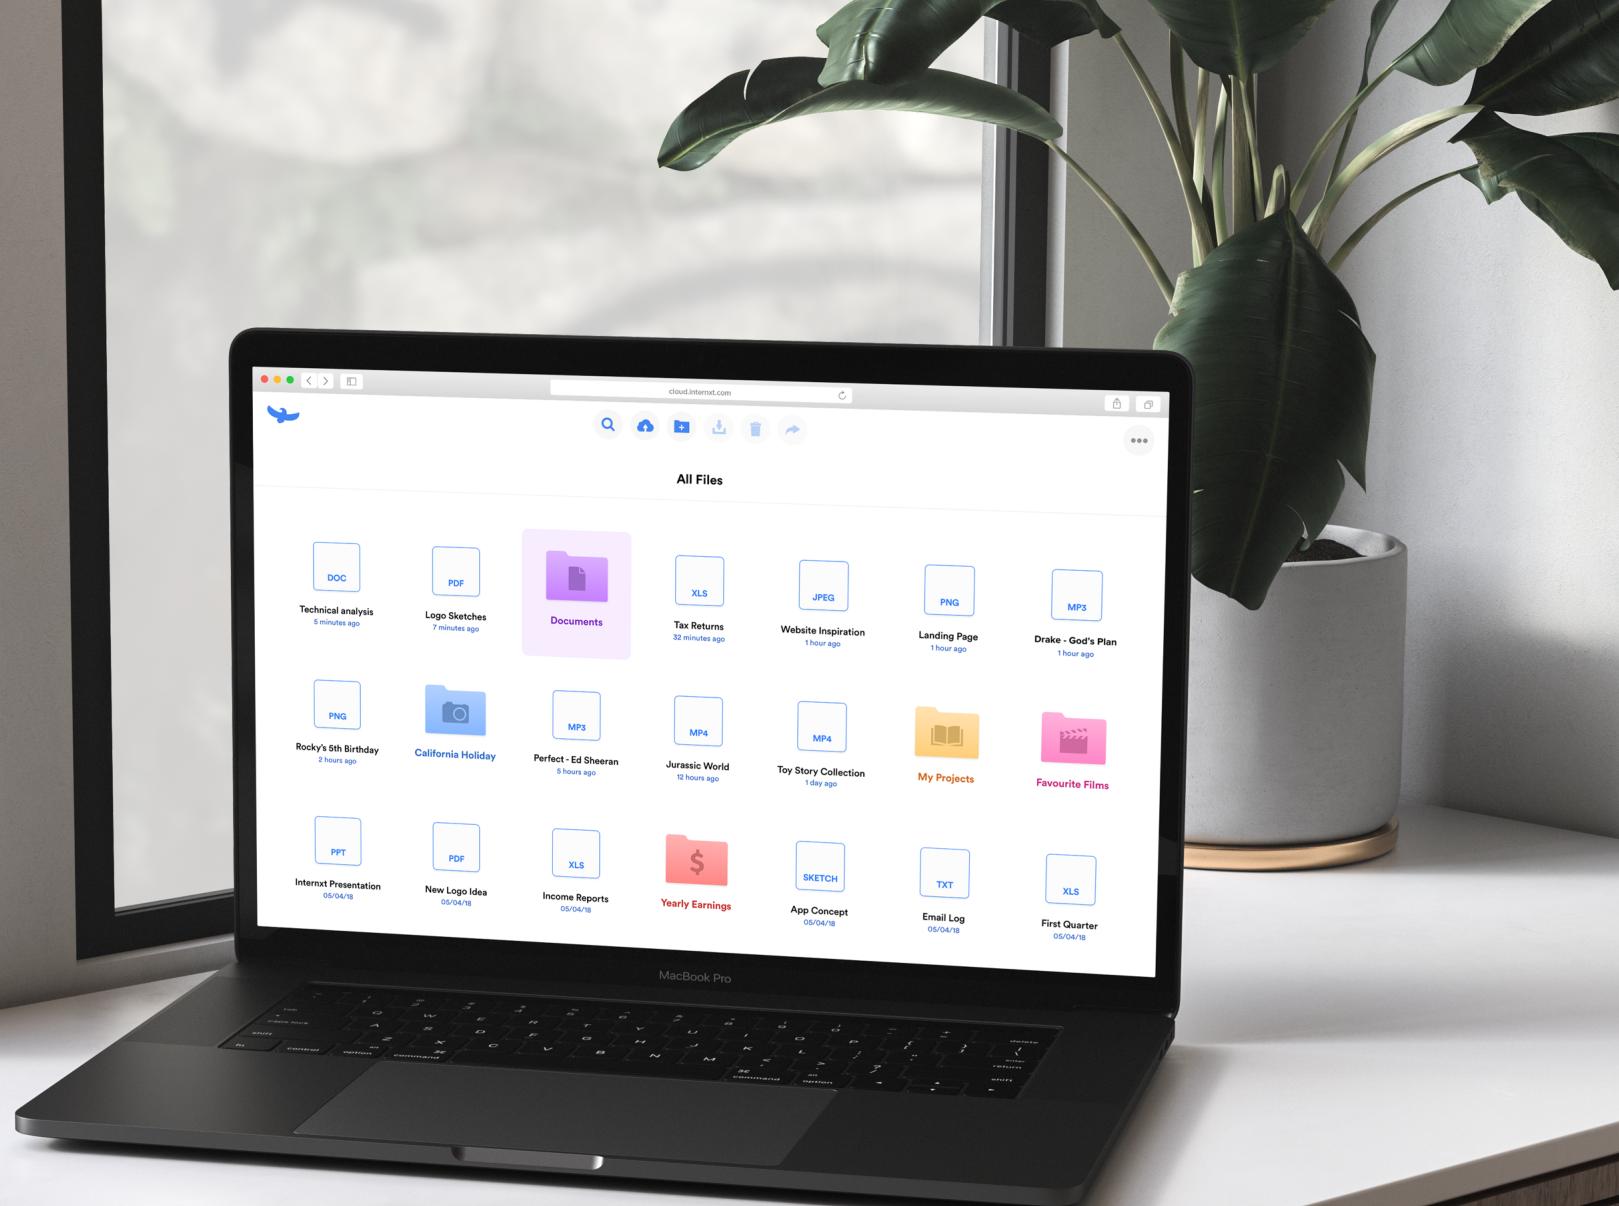

XCloud

Secure cloud storage.

The screenshot shows a clean, modern user interface for a cloud storage service. At the top, there's a navigation bar with a search icon, a cloud icon, a folder icon with a plus sign, a download icon, a trash bin icon, and a refresh/circular arrow icon. The main title "All Files" is centered above a grid of file thumbnails. Each thumbnail includes the file type (e.g., DOC, PDF, XLS, JPEG, PNG, MP3, MP4, PPT, XLS, SKETCH) and a small preview image. Below each thumbnail, the file name and a timestamp indicating when it was last modified are displayed. The interface uses a light gray background with white and blue accents for the icons and file cards.

File Type	File Name	Last Modified
DOC	Technical analysis	5 minutes ago
PDF	Logo Sketches	7 minutes ago
XLS	Documents	
JPEG	Tax Returns	32 minutes ago
PNG	Website Inspiration	1 hour ago
MP3	Rocky's 5th Birthday	2 hours ago
MP4	California Holiday	
MP4	Perfect - Ed Sheeran	5 hours ago
MP4	Jurassic World	12 hours ago
PPT	Toy Story Collection	1 day ago
PDF	Internxt Presentation	05/04/18
XLS	New Logo Idea	05/04/18
SKETCH	Income Reports	05/04/18
\$	Yearly Earnings	
	App Concept	05/04/18

XCloud

Secure cloud storage.

After the beta release we will be focusing our efforts on a commercial version. Starting November 2018.

Approximate marketing expenditure of \$1M between November 2018 – November 2019, it being around 50% of our expected expenses for that period of time.

\$1.3M total expenses expected during 2019. 220 TB monthly used storage expected by January 2019 and 2 PB by November 2019. Average revenue of \$0.0215 per GB, 25% of which net profit.

We will be executing numerous methods to grow our user base, such as: create a referral program, our sales team will be contacting corporations, conducting security audits to build further trust, Influencers trying out X Cloud and reviewing the product which will intice others to try it, an overall pricing structure that is cheaper than our competitors.

Series A investment round Q1 2019.
